

About YWeb CA

YWeb Career Academy (YWeb) is a 16-week training program that focuses on web development. Our goal is to increase diversity in the IT industry and create more opportunities for women and people of color.

The program has 3 elements that make it a unique program.

Technical skills: The core skills that the program covers are HTML, CSS, and JavaScript

Employability & soft skills: As part of the program, students are going to gain relevant experience and skills to be successful in the IT industry and any other jobs. Some of the skills the program covers include communication skills, time management, project management, and problem-solving skills. Students learn how to create a resume and cover letter, and how to address a job interview.

Case management: Since the participants enroll in the program and up to one year after completion, they have access to different resources and assistance such as job searching, transportation rent, and utilities assistance.

Employability & soft skills

In this part of the class, students learn professional skills that will help them to be successful in their future jobs. Critical skills such as communication, time management, and problem-solving skills are included in the 16-week training.

Participants will use technological tools that will help them in their careers. Some of the most used are G-suit, Zoom, Microsoft Teams, and Slack. With these and other tools, participants will increase their productivity and will be able to achieve their goals faster.

The goal of this class is to provide everything the students need to get a job after they graduate from the program. All of the YWeb students will have a professional resume, cover letter, and great skills to ace a job interview.

Soft skills classes are usually on Mondays from 9 am to 4 pm. Other presentations and special events are offered as part of this part of the program.
